Hi Mr. Dodson, so sorry I have not responded earlier. I will consult the EPA who provided the funding and get back to you.

Thanks so much,

Rosemarie Bowler

I have been tasked with clearing out old samples from our freezers and wanted to ask you if you need to get back any of the samples that were collected in the 2 studies in Marietta Ohio? If you don't need them back, would we be able to discard them?

Thanks

Charles

Hi Mr.Dodson,

as always, many thanks for your excellent shipment. It all arrived safely and makes the blood and serum shipment safe. They will go out overnight to you and the EPA Lab Monday morning.

Thank again most sincerely,

Rosemarie Bowler and Harry Roels

> I had planned on sending 2 smaller boxes each with dry ice and ice packs; one for the bloods and one for the serum. They should arrive on Saturday. I can truly appreciate field work since I always seemed to work longer and harder on field trips. Everyone always thought we were away having a grand time but I think you know what I mean. Hope things get easier.

> we are totally swamped with the work load and appreciate so much your fine help. Dr. Roels asked me to ask you to please send one smaller box for the serums that we have to send to the EPA lab. As you know we have only the one very large styrofoam box which is too big for the serums with dry ice and then also he stats he needs a smaller box for the bloods to go to your lab.
