Subject: NV update--please read!

Alexis, Elizabeth, and Enrique,

During my weekly coordination call with Nevada, Greg mentioned that Governor Sandoval and Administrator Pruitt will be meeting in D.C. next week. Greg requested that we keep this information confidential and not "broadcast it." He shared that he is developing briefing materials for this meeting, and plans to include Anaconda. The briefing material related to Anaconda will consist mostly of an update along the lines of "we are working on an NPL deferral, and we appreciate R9's support and engagement in this effort. " I asked if he planned to include anything related to Carson River and he said he does not. Other issues in the briefing materials were related to Air (ozone standards, emissions-ability to control sources, and the sulfur dioxide lawsuit that they are involved in?), financial assurance and budget. He asked that if we have any questions about this meeting, we call him directly. He shared this information in the spirit of coordination, but wasn't sure he was supposed to have. I promised to only share it Senior management. Thanks. Angeles
