That's right. We don't have any that would be ready to go in 2018.

However I've asked John to draft your response and remind them about eureka NV need. It did go through priority panel review.

If anaconda went to npl, we would need $ in 2019.

Enrique Manzanilla

Director, Superfund Division

US EPA Region 9

RAs/DRAs/ARAs/SFDDs – Dear Colleagues:

Good Day. My apologies for the urgency of this request but Barry and I wanted to make certain that you saw a draft of what OLEM is planning to submit today to the Administrator for consideration of SF remediation projects for infrastructure funding.

Would you please review the attached spreadsheet which contains national SF remediation investment sites and related site and funding information. The last column highlighted in yellow is an opportunity for you (the regions) to provide comments on the particular sites (e.g. livability and economic vitality, community support, reuse prospects, job impact, EJ considerations, etc.). If you don't have comments to include, please indicate that as well. We only need one person per region to respond. We plan to copy and paste your comments into what we provide to the Administrator today.

Please call me if you have questions but we need your feedback **before 2 pm E.S.T. today.**

Thanks,

Nigel
