We can do a paper on Anaconda, but I assume you're also covering the overall March listing in a separate issue paper.

Subject: Transition -- Anaconda and Rosemont

Hi Jessica,

I left you a message earlier, just following up on email.

We're in the process of finalizing the list of round 2 issue papers. Checking in on Anaconda and Rosemont and whether we need to highlight these projects (through issue papers) for the Landing Team.

Please confirm that R9 does NOT expect any decisions / major actions that will be happening on these projects during the Jan 20 – Apr 30.

Wondering if we may need an issue paper on each project (or one for both) for the Landing Team. Please advise.

Thanks

Laura
