Meeting w/ Anise Ahmed & Ben Cope 6/17/10 9:30am-10

10% of ev month low water @ 10 ft
Used CORMIX 3
Anise thinks it is significant
When used CORMIX 1, "waterfall" dilution was higher

Submerged outfall on cotin
Anise: thinks it is more mixing if they
move when water to salt wedge.
Anise said this is 2° round
They est'd flow for [redacted]

2° round of comments - comment should look into
the 10% issue

Anise - he will comment on this round

Wind speed - Oct 96
Ben thought they should use annual avg
