;
Dave,

In August 2012 Jere Johnson and a few Yerington stakeholders met with Brown and Caldwell (B&C) in Sacramento to agree on the format of database export files supplied with quarterly reports. The result was B&C has been delivering a simplified flat-file plus an Access database version containing a few queries quarterly. Currently Atlantic Richfield Company (ARC) is completing a supplier transition initiated migration of the former B&C EDMS Yerington analytical database to a new modern EQuIS database system. As this migration moves towards completion, we have had our database consultant, De Maximus Data Solutions prepare an explanation of the future deliverables that will accompany quarterly reports going forward. The future exported files are intended to provide identical functionally to that of past B&C exports, however there are minor variations and an explanation was prepared for your information (attachments). We would appreciate it if you can acknowledge that the EPA approves the change prior to the submission of the next quarterly report.

If you have any questions please call me.

Thanks,

-jack
