Subject: OU8 Figures

;
Here are my comments on the PP figures:

- #2 X-section: Could be better by adding more engineering designs showing proposed bench cuts and lifts. Suggest using the same language as in in the PP, such as replacing "soil cap" with "ET Soil Cover"
- #3 Concrete Evap Basin: Add minimal measurements (H x W x L) to figure to show some scale of size and depth of the evap basin. The PP doesn't have much discussion on the construction of the 2-acre concrete basin that relates to this figure.
- #4 E-Cell: Is ther any dimensions that can be added to show size?
- #5 Stormwater Drainage Channel: Is there any dimensions that can be added to show size? For instance, how wide are the channels and how high up the sides will the rip-rap be placed? How thick is the proposed rip-rap?
- #5 Stormwater Drainage Plan: No comments
- Fig 1: No comments
- Fig 2: No comments
- Fig 4: No comments

Thanks,

Dave Davis, Geologist
