Hello Dave,

I appreciate your efforts as we move forward with the Anaconda Mine Site activities.

I look forward to our future plans.

Best,

Cynthia O.

Thanks Cynthia,

I've received the request and am working with the EPA Grants Management Office. Hopefully they can approve an amendment instead of requiring a new application. I'll let you know when a decision is made.

EPA appreciates the Tribe's participation at the Anaconda Yerington Mine Site and we look forward to continuing to work together to develop solutions to the environmental impacts from the site.

We can talk more about a reporting format when the grant action is made final. Sorry for any confusion about reporting but I'm sure we can come up with a format that works for both of our organizations.

Best Regards,

David A. Seter, P.E.

Importance: High

Dave,

I was out of the office on Thursday and was able to meet with Chairman late Friday.

In regards to requesting an extension:

Walker River would like to request an extension of the Cooperative Agreement because we would like to have our continued input and attendance at meetings and participating in the Superfund activities.

All my updates since I have been hired have been through the Program Project Officer, Veronica Swann. I left her a message on Friday to call me, but have not received a return call. I was not aware or made aware of additional reporting for the Superfund grant to be completed separately. I would have no problem with updating you and look forward to continuing our future projects.

If there is a separate process please share that information so I may comply with the additional reporting. It is my understanding that attendance at the community meetings, phone conference calls between Dante Rodriguez, and the group which I physically attend all meetings since 02/ 2015 is what was required.

We also receive the technical meeting information from group regarding the groundwater issues in Yerington and the Wabuska Drain.

Best Regards,

Cynthia Oceguera

Subject: Request - Superfund Grant V00T39701

Cynthia,

Good afternoon.

I'm working with the EPA Grants Management Office to see if it's possible to extend the Superfund Support Agency Cooperative Agreement (V00T39701) instead of requiring a new application.

To explore this option I need to ask for a couple of things:

- That you send me an email requesting an extension and the reason for the extension (for example, the project is ongoing and requires Tribal input on technical issues and consultation on site management issues). The sooner you can send me this the better.

- That you update the progress reporting required under the grant (we can work together on this - your predecessor may not have briefed you on the grant's reporting requirements). Perhaps initially in a separate email from the extension request you can send me a couple of sentences on key activities for which the Tribe has been using the grant (to attend and participate in technical meetings about groundwater and Wabuska Drain, to attend community meetings, etc.). Then we can discuss a simple reporting format to keep track of activities.

Thanks very much. EPA looks forward to finding ways to continue working with the Tribe.

Best Regards,

David A. Seter, P.E.
