AWGFactSheet.2518.doc

I have added basic performance specs and edited the text around that section slightly. We need to decide who the POC for this is? Jay?

Hi all- attached is the WaterGen manual which provides good overview as well as water quality and energy spec sheets that they have provided. Also attached is a product brochure from their website that may be useful.

Thanks,

Michael

Mike

Michael Jahne can probably get you the specs on the AWG unit. I'm copying him on this email.

Brad I've looked these over and the changes look good to me. Jay do you want to add any more technical details? And we need the name of the system and the claimed specs, which I didn't have to hand.

Mike-

I went through your initial stab at the fact sheet and made some suggested edits in Track Changes. I think this is in good shape at this point. When you have time, look it over and let me know what you think.

Jay-

Here is some info on fact sheets.

•□□□□□□□□ The main ORD guidance page is here: https://intranet.ord.epa.gov/communications/fact-sheets

•□□□□□□□□ The attachment is one of the three templates.

•□□□□□□□□ As you noted on the phone, the guidance is a little short on details, but the main ideas are:

- keep it simple,
- no more than two pages, and
- pictures are nice.

•□□□□□□□□ Here are a few examples of solid fact sheets:

- https://www.epa.gov/sites/production/files/2017-12/documents/village_blue_fact_sheet_14dec17.pdf
- https://www.epa.gov/sites/production/files/2015-08/documents/sswr_factsheet_2015_final_8-21-15.pdf
- https://www.epa.gov/sites/production/files/2016-08/documents/scienceinaction_small_systems_final-508.pdf

•□□□□□□□□ If you'd like, I can help you develop your AWG fact sheet. Just let me know.
