---

Hey, Wally. Can't remember if this was sent to you but since the original email was "addressed" to Calvin (although Hladick) was on the "to" line and Calvin has responded saying he would hear from our group, I think we are good to keep going. Thanks for having Monica reach out to him directly.

Beth Sheldrake, Emergency Management Branch Chief

Subject: Remedial Investigation Feasibility Study WA MTCA Level 2 Site 4900 Seabeck Hwy Central Kitsap County

Thank you, Mr. Terada. I look forward to communicating with someone from Ms. Sheldrake's Branch. I had communicated several years ago with Mr. Jeffry Rodin who had indicated that when the gun club appears to be 'closed' EPA Region 10 may consider the next steps in remediation planning. The State Dept. of Ecology lists this site as a MTCA Level 2.

Certainly having been closed to discharge of firearms for over four years and Superior Court appeals being consistently denied is a good indication of closure.

Sincerely,
(b) (6)

Please accept my apologies for responding so late to your message. I want to thank you for making me aware of the site history and related concerns. I am not exactly sure what EPA Region 10 can do to assist with further assessment and/or cleanup of this property, but I will ask my Site Assessment Program to assess the information provided and determine next steps. I am going to turn your inquiry over to my Emergency Management Branch to determine next steps. Beth Sheldrake, Manager, Emergency Management Branch will assess, assign, and determine next steps and a programmatic point of contact for you.

If there is anything else that I can do, please let me know at your convenience.

Thank you very much for bringing this site to our attention.

Sincerely,

Calvin

Calvin J. Terada, Director

Good day, Mr. Terada. I am writing to advise you of recent events regarding the former shooting range located at 4900 Seabeck Hwy. The first two attachments by and on the behalf of the State Recreation and Conservation Office (RCO) address Conversion (demand for repayment) of a RCO Grant issued to make improvements at the subject shooting range.

Washington State Department of Ecology ERTS Report #631120 dated 27 Dec 2011, is germane.

This shooting range has been under two concurrent Superior Court injunctions against discharge of firearms since 2 December 2016. Per the EPA Region 10 report "Integrated Assessment Kitsap Rifle and Revolver Club, November 2011" lead, copper, and other heavy metals continue to litter to property and adjacent wetlands in the Chico Creek watershed. Attachment 3 is the Chapter 9 summary for the EPA Region 10 Integrated Assessment.

I wish to inquire what actions may be initiated toward preliminary remediation planning for this site.
