Thanks. You'll be on the call, right? I'll go to the conference room. Could get interesting.

Hi Shaun.

A draft of the CRADA, with the Statement of Work, has been sent to Water Gen for their review and comment.

ORD had a phone call with Water Gen, and they want exactly what we suspected and CANNOT give them – an endorsement, a stamp of approval.

Even when EPA had their ETV (Environmental Technology Verification) program, all the vendor got was an unbiased report of the performance of the tested technology – good or bad. EPA has never nor can we endorse a product or technology.

NERL (Ardra Morgan in Jay's shop) prepared a notice for availability for other potential cooperators to enter into CRADAs with EPA. ORD and the FTTA team will post the notices.

I provided NERL a Materials Transfer Agreement (MTA) for if or when Water Gen sends EPA a device to evaluate in the NERL Lab.

Believe it or not, this CRADA is moving very fast.

Hi Laura,

Can you please send me a brief update on the atmospheric water generator issue for Elise? The purpose is to quickly get her up to speed before our meeting this afternoon (since she and I have been out).

Thanks so much!

Shaun
