Subject: RE: Does NEPmap match Santa Monica Bay NEP study area assumptions?

Erica,

I have reviewed the map and perhaps we can quickly add it to our conversation this afternoon at 2:30. Truly, the only question is the application of study area versus project area on this map.

From my understanding the boundary as drawn is the study area and a subset of this geography is our project area, namely the coastal watersheds and Santa Monica Bay.

Last consideration we have extended some of our efforts either directly or through partnership and importantly (not using 320 funds) to conduct research along the southern California mainland coast either in coastal wetlands or offshore.

Talk to you soon!

Tom

Subject: Does NEPmap match Santa Monica Bay NEP study area assumptions?

Hi Tom,

We were wondering if you have looked at the NEPmap to make sure that the study area depicted there matches the SMB NEP's expectation of its study area. Can you take a look and verify that

it correct/incorrect and let us know? If it needs to be corrected, then we will help you get in touch with the right folks at headquarters.

Here is the link to the metadata: https://catalog.data.gov/dataset/nepmap-national-estuary-program-mapper

You can find the study area designated on the NEP Boundaries file on this web site, linked from that NEPmap page:

https://gispub2.epa.gov/NEPmap/

Thanks.

Best,

Erica
