same notes in Envision

10:55 Tahoe Asphalt C00030679 R.S.

- No odors @ Industrial Ave upon arrival

11:03 - Walked to S side of plant, no odors detected until @ S side of plant about halfway along property, to SE of batch equipment.

11:04 - Wind shifted to NEasterly, odors dissipated, walking to SW of batch equipment.

11:08 - Batching stopped right as I arrived to SW of equipment ~11:07

- A pile of freshly batched asphalt is being staged @ SW corner of property, will go next to it & do odor observation.

Tons
T~600
W~600+
Th~1000
F~1000

11:12 - 15>D/T>7 ~20 ft SW of pile

~11:20 - Spoke w/ Dale

11:32 - Tar refill load filling up tank

~kind of rotten egg like smell

- winds shifting, hard to find a place to do an observation

11:36 - ND - may be due to erratically shifting wind

11:52 - 4>D/T>2 @ E side of property

11:53 - Odors gone from " " " "

First load @ 7:05 - dry batch Th 7/7

11:45 David Bogard 1169 Dedi Ave
- never smelled or heard plant.
- lived there approx. 1 year
- David was walking along trail around plant & spoke with me briefly when I asked him about Tahoe Asphalt

12:00 Walked to Industrial Ave. - no odors on N side of property

12:15 ND - could smell tar before I started but wind shifted during observation and resulted in ND reading

12:30 Departed, will drive around area looking for paving projects for a bit.
