Great stuff, John. Thanks very much. I probably won't be able to look at these till next week (watch officer duty), but I'll get back to you soon.

Also, I just got a look at the two videos that you guys put together on the Floods and Snake River. Very cool.

Peter

Here is our draft for the HQ quarterly story on R8's response to the Red River Supply Warehouse Fire in Williston, ND.

Also attached are 6 photos and the following cutlines for you to choose from.

1. Applying dust suppression in exclusion zone
2. Charred silo after washing
3. Level C entry into hot zone
4. Little Muddy River Canal
5. Red River Supply
6. Work Crew removing vegetation from USCG relief channel
