---

Mr. Garcia

Attached are the annual data metric analysis' (ADMAs) for Texas for the CAA, CWA and RCRA programs. The ADMA is the same as a DMA, but is conducted on an annual basis for those state or local agencies that are not undergoing an SRF review during the year. The annual DMA uses frozen data verified by states during data verification. It allows for annual identification and resolution of counts of facilities and activities, and assists in managing performance issues.
