Hi Adam,
Please note that your fax arrived (all ten pages).
Many thanks,
Dawn

Please note that all faxes come directly to my computer, so it can be sent whenever. I believe you already have my fax number Personal Phone / Ex. 6

Many thanks,
Dawn

Hi Adam,
Thank you for the information on the organization changes and heads up on the fax.
I am at the GlobalChem conference but I'll ask my colleague Dawn Clark to look out for the fax.
Bethany, I'll connect with you going forward for any questions and submissions.

Thanks, Kathy

Hi Kathy,

I wanted to let you know that there will be a new point of contact in the Office of Pollution Prevention and Toxics' Chemical Control Division, as I'll be going on a rotation at another agency beginning on next Monday, 3/5/18, through mid-July. The new contact will be Bethany Olson, who I cc'ed on this email. Her phone number is (202) 564-2914.

Also, we have some follow-up questions based on our review of the information provided in response to the questions sent, which I'll fax today, and the response can be sent to Bethany's attention. As a heads up, the questions are included in one column of a table that also provides some insight into our review of the responses we have received. We thought that would be the most helpful way to follow up on these questions, to try to help indicate what specific information might be helpful. If we don't receive answers, we are able to move forward with the assessment but will be making standard, conservative estimates. I'll be sending the fax this afternoon – is there a specific time that would be best to receive it, or is any time fine? It's about 10 pages, because of the format of the table, but there are about 10 follow-up questions.

Thanks,
Adam
