McIntosh letter to USFS on new results.pdf

Ah, read this version instead.

Subject: minor edit to memo

All,

I made a very minor change to the memo I sent out. I had forgotten to mention our funding source, and added a concluding statement about implications for groundwater resource management. Please see/use the attached updated memo.

Jennifer

Subject: UA study results relevant for Rosemont Copper Mine decision

All,

I thought you might be interested in the attached letter I sent to the Forest Supervisor of the Coronado National Forest (Kerwin Dewberry) in regards to the USFS' decision about the proposed Rosemont Copper Mine. The letter contains new results from our recent study in the Upper Cienega Creek watershed.

I'm happy to discuss if you have any questions.

Regards, Jennifer
