Subject: FW: Map guide

Hi, Elizabeth, in talking to someone else, I was reminded of this tool we set up to facilitate overlays of GIS information on aerials or USGS topo. Might be helpful to you or others working in Pima County.

http://gis.pima.gov/maps/cmo/rosemont/ is the link to the Rosemont mapguide site. You need to download Autodesk Mapguide to use this. (but it's free and easy). Note that most other maps are dated. Here is a pdf map.
