Tom,

Per your request. Please note, there is a concern with various versions of this discussion summary on Illinois River. The attached summary is the document both states (Ok an Ark) have agreed to. We understand in paragraph one the factual language referencing 303d impaired waters in Arkansas along the Illinois River is not stated correctly, however the Region prefers to utilize the summary agreed upon by the states at this point. I have left a message for you as well as John Goodin to discuss this matter. For briefing purposes please use this version.

David F. Garcia, P.E.
Acting Director
Water Division

U.S. EPA Region 6

Hi Crystal- this is first time I've heard that this meeting is today (had heard there would be one but didn't know it was scheduled for today). We'll reach out to the Region. -TomW
