Wendy Thomi
US EPA
Montana Office
Helena, Mont. 59626

Dear Wendy.
I know a friend Ruby Hagner, 409 E. 8th St. Libby Montana, 59923, who years ago put Vermiculite insulation in her attic, She has been trying for 5 years now to have the EPA, Remove it, She goes up to alaska in april and comes back in November, She goes up to work there, So she's gone all summer, it is an old house that she is trying to remodel each year. She needs to tear off and rebuild and re roof part of her roof.
She has had to cover it with plastic every year and it has leaked, waiting to get the asbestos out.
She went to the EPA, the other day, they told her, that when they did do it, they would

have to throw a lot of stuff out of her place, She sure does not want her things throwed away.

She is a senior citizen and is very upset about this situation. All she wants is that insulation sucked out of her attic so she can do that part of her roof. Can you talk to the E.P.A. down here?

Sincerely
Andrew Pederson
179 Forest ave.
Libby, Mt, 59923

P.S.
She can not do her roof until the asbestos is taken out.
She can not wait much longer.

If it is not done soon her roof will keep leaking and ruin her house.
