Subject: RE: Implementation of Work Plan for Proposed Soil Samples UPRR Segment-Former Pechiney Cast Plate Facility, Vernon, CA

Hello Kim,

Thank you for the news regarding the sampling at the railroad spur. Did EPA approve the sampling plan? I believe that my colleague, Nathan Dadap, was working on the project at that time. Please confirm if EPA approved the plan.

Also, on another related topic, I would like to get the status of the land use covenants for the different parcels. Nathan Dadap left EPA when the land use covenants were being developed. For Parcels affected by PCBs, the land use covenants needed to be reviewed by EPA before finalization and recordation.

I look forward to your call or email.

Thank you for your courtesies.

Best,
Carmen

Yes, I have attached the work plan that was submitted to DTSC, EPA, and UPRR on December 15, 2015. We have been working with UPRR over approximately the last 18 months to get access to the property.

O.K. Thanks for this info. Is there any sampling plan prepared?

Chand

Good morning,
I would like to update you on the status of our proposed soil sampling on the UPRR segment adjacent to the Former Pechiney Cast Plate Facility in Vernon, CA. We have been provided access to the property by the Union Pacific Railroad to conduct the work and made the required notifications to the various railroad departments. We currently have the work scheduled to be conducted on June 15, 2017. We anticipate the sampling will take one day to complete. Please let me know if you have any questions.

Kim
