Subject: RE: Newark Lead Monitoring

Christine,
Newark Water Dept. is collecting lead and copper samples on a 6-month monitoring schedule. I am copying Kat Burkhard to verify my answers in case there are any changes since we last discussed. If you look in DWW – you can see where they are with this monitoring period (Jan – June 2018).

Regards,
Pat

Subject: Newark Lead Monitoring

Hi Pat –

In follow-up to the 5/2/18 call on lead in the Newark water system – I wanted to check in if the Newark water system conducted sampling, or has sampling been scheduled? Is the Newark system on a 6-month monitoring schedule, per the LCR, or has NJDEP made a different determination?

Please let me know if you have any questions. I missed the 5/2 call due to jury duty, so I apologize if this was discussed previously, but any updates you have will be most appreciated.

Thank you!
