I live on Essex in Riverside Gardens. Due to all the problems with the landfill, I feel our only solution is to be relocated.

I no longer feel safe living here this close to the landfill. The things which have thus far been accomplished amount to nothing.

The true Death, what's actually in the landfill are unknown, and furthermore nothing's been done to find out. The report sent to us was untrue on many different accounts.

Basically what's been is a lot of studies and a faulty venting system installed.

Our property value has gone down. Most realtors would not list.

We will not settle for more studies and no permanent solution to the problem. The only two solutions are relocation or total excavation.
