Dear Ms. Houston

This is a written statement of the physical effects upon myself and my family since moving to the Riverside & Gardena area 1yr ago.

Much to my disagreement with the E.P.A. I feel the landfill in combination with the nearby plants does indeed have physical effects on people living in this area.

Ms. Beverly Houston

Until I had moved in this area I have never had problems with dizziness quite fregently, headaches & sinus type problems. Nor had my husband.

We presently have 4 children all under the age of 6 yrs. and though EPA claims that there is little danger in the air pollution caused by air surroundings I feel that over a course of my childrens growing years they definatly will be effected by what is in the air & under the ground - CONTAMINATION

On numerous occasions I myself have experienced severe burning in my nose just by going outside my home on given days.

True the landfill may not be the only cause of this repeated discomfort.

I feel action should be taken.

My name is Sharon Blackburn and my husband is William R. Blackburn we wish to vote for relocation of this entire area due to this situation of danger and prolonged physical harm on all our neighbors.

Mrs. Wm. R. Blackburn
