Dear Miss Huston,

I am writting in response to the meeting on the Lee's Lane landfill.

I feel that for too long County Government has had their Heads turned, eyes closed, and ears shut to the real problem that lies in the landfill. They should never have permitted such a lanfill on the river. The landfill operated without a permitt and yet County Goverment did nothing! We as a Community keep protesting and telling the officials that Hazardous waste was being dumped and still noting was done, until the Methane Gas became bad enough in their opinion that seven families were relocated. It should never have stopped with just 7 families being moved out, it should have been the Whole Community. I feel that they have only hurt us with the venting system, our air that we breath is not healthy and yet nothing is done. The Borden Chemical Co. is only 200 ft. from our Community and

(2)

repeatedly release chemicals in the air, that the Fire Dept. has had to make several runs late at night to check the air and still nothing is ever done. I feel that if E.P.A. is for our enviroment then it should be their duty along with County Government to see to it that something be done once and for all. As a taxpayer it is my opinion that it would be ~~Chea~~ cheaper to buy us ~~out~~ out and relocate us than it would be to clean up the landfill.

Sincerely,
Mr. & Mrs. Harold Slaught
