Subject:	Heads Up: Bluetec Testing
Date:	02/19/2008 08:11 AM

FYI:

I have requested the FTP. HFET and US 06 testing of the Mercedes MBX/ GL 320 BLUETEC (SCR Technology) scheduled for availability at our lab 13 March.

This vehicle meets T2 Bin 5/ LEV-II ULEV standards.

VERIFY gave this error message:

"There was an error connecting to LOD. The Verify administrators have been notified. They will correct the error and complete the data transfer to LOD. STAR Transfer Error Message: Cannot find evaporative system data in CFEIS."

Note to Sandra: Does this delay test scheduling? Is there anything for us CISD or LOD to do at this time?

This is a diesel so there is no evaporative emissions.

Regards,
Russ Banush
