RE: Application for Administrative Permit Revision for Navajo Generating Station under Tribal Minor New Source Review

Dear Mr. Talbot:

On May 1, 2015, the U.S. Environmental Protection Agency (EPA) Region 9 Air Permits Office received your application for an administrative permit revision under the Tribal Minor New Source Review (NSR) Rule at 40 CFR 49.151-161 for the addition of control equipment for mercury emissions. The emission increases from this project are below the applicable thresholds for both the major and minor NSR programs. As such, this change may be accomplished through an administrative permit revision as provided in 40 CFR 49.159(f)(v). Our Technical Support Document is enclosed.

Enclosed you will find your revised permit that allows you to proceed with the project in your permit application. It is Region 9's practice to include the requirements for the PSD and Tribal Minor NSR program in a single NSR permit document. As such, we are revising NGS's existing PSD permit, No. AZ 08-01A, to add the Tribal Minor NSR requirements of this action. Your Tribal Minor NSR permit number is T-0004-NN. The added conditions are only applicable under the Tribal Minor NSR rule.

If you should have any questions please contact Lisa Beckham of my staff at (415) 972-3811 or beckham.lisa@epa.gov.

Sincerely,

Elizabeth Adams
Acting Director, Air Division
