Subject: Navajo Generating Station-Kayenta Mine Complex Environmental Compliance Status Update - 2QCY2015
Attachments: NGS-KMC EIS Status Update_Q2 2015_Final.pdf

Hello All:

Please find attached a current quarterly status update on the Navajo Generating Station-Kayenta Mine Complex (NGS-KMC) Project.

This status update is a compilation of a main body and a number of appendices (These documents are consolidated into one PDF.). This current status update consists of the following documents:

1. Main Body - Environmental Compliance Status Update. This document is a short narrative summary of the major accomplishments to date in achieving environmental compliance for the project, along with a short summary of current/recent developments that relate to or affect the project.
2. Appendix A. Appendix A provides a short general historical background summary of NGS and KMC for context purposes. This document will remain fairly static.
3. Appendix B. Appendix B provides the most current high-level Milestone Schedule with target completion dates for the major EIS milestones/deliverables.
4. Appendix C. Appendix C provides a graphic that visually describes our project management structure.

5. Appendix D. Appendix D is Table 1, "Status of Federal Actions by Statute/Process," which provides somewhat more detail than the Status Update narrative regarding activities underway in support of achieving environmental compliance.

I hope you find these documents helpful. We want to ensure this process and the compliance documents that result are useful in supporting your role as a federal agency having an action to take or approval to issue. Any feedback you have in this regard is more than welcome.

The work, expertise, and insight provided by your agency is appreciated and valued.

Should you have any questions or concerns whatsoever, please do not hesitate to contact me at any time. You may also contact the Bureau of Reclamation's Russ Callejo, Program Manager for the NGS Environmental Compliance Program (303-445-2918 or rcallejo@usbr.gov), or Sandy Eto, Project Manager for the EIS (623-773-6254 or seto@usbr.gov).

Thank you,

David
