oil 10 mg/l not

Louise Kulver 296-1980 - 7-31-96

3 mg/l more typical level input

need storage area for spill control
CPS will help slightly or API

oil pillows / booms ~~[illegible]~~ effectiveness of products vary

~~[illegible]~~ ~~month~~ change pads every month ±

API need to be large to match CPS performance) CPS/6 months
similar to detention pond volume
~~detention~~

Tees at outlet of property for residential

was: 5 Acres subject to vehicular traffics

will be changing SWH manual but when?

now: define high use vehicle turnovers 10 vehicle/day 7/11, or gas station
then oil control

Compost filter WH only one vendor
replace media as it absorbs oil

Shell send me copies of draft on oil separators
