Martha_CHe_Co ROD 07-88840.pdf
MARTHA_Chem_Co ESD07-40026423.pdf

OK,

This is what I was able to pull up in SEMS. I am busy on a couple other items and will be out Mon and Tue for other work. I am going to request that Diana Engeman follow up on this item next week.

- Site is non-NPL
- Final ROD was March 06, 1992.
- ROD called for full removal and GW monitoring.
- ESD was issued November 28, 1998 reducing 10 years GW monitoring.
    - The ESD also stated that all other objectives in the ROD have been met.
    - The state of Missouri did not concur with the Amendment.

Thanks,
Preston Law

I believe the site was closed out but definitely need to check the files. It was an old PCB site.

No, the schedule does not show any FYR.

MDNR received a request to Carol Comer regarding the Martha Rose Chemical site, from someone publishing a story. MDNR wants to know if EPA has done 5 year reviews as called for in the ROD---their words below. Can the SEMS coordinator or Remedial program answer this question ?

We have a follow up on this site from Michael Carolan again and have one question for you all. Mr. Carolan wrote an email to our Director asking additional questions about the site and decision. I will forward his questions just so you see what we are responding to, but the question for you, or whomever would know from EPA, is whether 5 year reviews have actually occurred on this site as called for in the ROD?

We're not holding our draft response to Ed on this one to get your answer, but know that we will have follow up from him on our write up before anyone contacts Mr. Carolan so it will be good information to track down. Thanks,

Valerie Wilder
