THE SECRETARY OF THE NAVY
WASHINGTON DC 20350-1000

June 14, 2018

The Honorable Nancy Pelosi
House of Representatives
Washington, DC 20515-0512

Dear Representative Pelosi:

Thank you for your letter dated May 14, 2018, concerning the radiological cleanup re-work at the former Hunters Point Naval Shipyard. We appreciate your many years of support for this complex environmental cleanup and your efforts in securing an additional $36 million in funds this year.

The Department of the Navy (DON) supports the California Department of Public Health's (CDPH) ongoing consideration to re-test Parcel A. Regarding Parcel G, because this is the City of San Francisco's top priority, DON plans to release a revised work plan to re-test Parcel G by mid-late June 2018. After the regulatory and public review period (60 days), DON will finalize the work plan and commence re-testing this fall. DON is committed to coordinating our efforts closely with all stakeholders, to include CDPH, the Environmental Protection Agency, and the California Department of Toxic Substances Control and will continue to host quarterly meetings with the community and keep them informed online, through email, and regular mail.

Regarding Tetra Tech EC, the two former supervisors recently pled guilty to falsifying records. DON proposed these individuals for debarment and is working closely with the Department of Justice on this matter. In the absence of new information, there is no basis under the applicable regulations to suspend or debar the company. However, DON issued Tetra Tech EC a Letter of Concern which outlined their poor performance. My staff will keep you informed as this contractual discussion continues.

I look forward to engaging with you and your staff throughout the remaining environmental cleanup and property transfer process. If you require further assistance, please contact Mrs. Phyllis L. Bayer, Assistant Secretary of the Navy for Energy, Installations and Environment at (703) 693-4530.

Sincerely,

Richard V. Spencer
