Greatings from GlobalChem!
We are assuming it will happen at 3pm March 1 at your offices (wherever that may be—I'm actually not sure) with you and Kris.
As we get closer to the meeting and confirm who from ACC will attend, we will send Leslie the form she provided to us.

Thanks,
Nancy

Hi Nancy,

Just following up on the status of this meeting?
Thanks,
Tina

Ok, thanks. When I originally thought coming over would be easier was because I assumed we were engaging the members through a meeting of a standing committee or workgroup.

> Tina,

That could work. How many people can your space accommodate? When I sent out the hold the date to our risk team I got about 12 responses. Is that workable?
I had thought Kris was going to be in town. Should we find a better date when she can join us in person?

OK, that's fine. If it's going to be just ACC staff, why don't we meet in my office then. We'll be able to video Kris in. Leslie will work with you to get a list of attendees.

Hi Tina,
Glad to hear March 1 still works. Thanks so much for your willingness to come on over.
Why don't we keep it small and just go with some ACC staff for now. Sound alright?

See you soon!
Nancy

Hi Nancy,
This email got lost in my email clutter – but thankfully I had already reserved the time on my calendar and Kris's. Is this presentation just for ACC staff or will there be member company staff listening in/participating as well?

Thanks,
Tina

Subject: March 1 discussion

Hi Tina,
Thanks for chatting yesterday. We would indeed welcome a discussion with you and Kris to learn about your visions for NCEA, including IRIS.
It need not be limited to IRIS at all. Considering your background there is much interest in hearing about how your work leading the CSS division, and your exposure expertise can inform IRIS, NAAQS and other NCEA products and activities.
March 1 at 3pm would work well for our staff here at ACC. If this still works for you and Kris please let me know and we can lock it down.

Btw, I think there might have been some confusion regarding the inundation of calls from ACC. I've checked and best as I can tell, only Kimberly reached out on behalf of the formaldehyde panel. It seems some of her voicemails might have gotten forwarded to multiple people so there was the impression she was calling everyone individually but that was not the case. I've asked our risk team folks to give you and Kris some time to settle in and will also make the same request to our ARASP coalition this afternoon. My guess is folks are generally anxious about timelines and what the change of leadership will bring regarding priorities, so that may explain why other groups are calling. I'm hopeful the discussion on March 1 will help answer a lot of questions, at least within ACC.

Many thanks!
Nancy
