Subject: RE: Chloroprene

Hi Jerry,

Ex. 6 Personal Privacy (PP)

I expect to start back on the chloroprene project this week, having cleared the program office needs. I will still be juggling it with PFAS in particular, but expect to put in a substantial portion of my time now. A first step is getting the peer contract rolling, which is mostly boilerplate but the charge questions are the big thing. I had started writing something shortly after the meeting in June, so that won't be totally from scratch, but I need to extract some numbers from the metabolism data to complete those. We will also need to finish QA of the model code, etc., which takes some time but I expect to be straightforward at this point.

Best regards,
-Paul

Hi Paul,

Ex. 6 Personal Privacy (PP)

I'll apologize in advance for pestering you about this so close to your return from leave. We have a call with Denka later today and they will want to know if there has been news from your side since our last call. If you have any tidbit of info that I can pass along that would be great.

Regards,

Jerry Campbell
