Letter of Protest

We, the Charterers of mv PAC ATHENA, hereby issue a protest that the Low Sulfur Fuel Oil we had stemmed and supplied with your company is out of specification and would not comply with the relevant IMO/US EPA regulations.

The initial 3rd party (Maritec) test results of the ship's sample showed that the Sulfur content is not within specification.

A joint test with your representative at Geo-Chem on the barge sample confirmed the stem was off specification. All test results were sent to you via our affiliates PCL Bunker department.

We hereby hold you responsible for any delays, losses, fines and any direct consequential costs should the LSFO supplied be treated as non-compliance in respect to the MARPOL limit enforced in the ECA region and/or US EPA regulations when trading in US waters.

As Charterers
