Hi Richard -

As a follow-up to our conversation earlier this afternoon, here are a couple of excerpted chapters from the Community Involvement Handbook that deal with CI requirements for non-time critical, time critical and emergency response actions. Hope it helps (if you only have 30 seconds, look at the table on the page originally numbered 55")

Thanks for telling me about the non-time critical removal that may be in the works for the LST-1166 near Rainier, Oregon later this year. I did a quick google search and found this Wikipedia article about LST-1166, including a recent photo and information about how the ship was vandalized.

Based on the amount of information available online, there is pretty high potential for community and media interest in any work that we might do, and it would be good to staff up with a community involvement person early on. Please keep Jeff and I posted on the status of this removal action.

Thanks,

Judy
