While we won't have a call today, I am providing our initial analysis of the 38 WAPs, that Elaine prepared. (We are still missing 22 WAPs which is important that we get.)
The first part of the document gives summary information and outlines the analysis. The second half is all the data/information I pulled from the 38 WAPS. We'll discuss further, on our call scheduled for September 4, to get your feedback on the content and whether we need to focus on other parts of the WAPs.
