Richard:

Hey there.....here is the revised Figure, as per your requested edits. Please let me know if it will work or if you would like additional edits. Also, I was not sure whether you wanted to TOPO in the end, so we didn't edit that one. Thanks.

Hey John,

I like the sat image/map pretty much like it is, but I think it might be helpful to add a small inset map to the lower left showing where the site lies in context of the two states. Also, I'd like the title changed:

Instead of the title "Site Layout", it should read "Site Location Map"
Underneath this, it should read "LST-1166 Site"
Keep "Columbia County, Oregon"

Thanks,

R:

No problem....I think there are a number of enhancements we can do, depending on the level of info desired/needed. Just let me know and as we discussed, I can arrange to have you chat with our GIS person if/as needed to go over what makes the most sense. As well, we can change any details such as Fig #, Name, credits, Legend, etc.....whatever makes it/ them best fit your document. I purposely had him leave a TechLaw designation off, but put the EPA logo for related reasons.

Anyway, just hollar if/when you need anything.

Thanks John. I took a quick look, and the pdf/sat image looks pretty good. I'll review one more time today and let you know of any changes or corrections that might be needed.

Thanks again,

Richard:

I wanted to get you a few things to look at and chew on since the holidays delayed our reply. I had our GIS person put a figure together based on some of the info you asked for. He also found a topo, but it is not a good quality one, so we may want to look a little deeper if that ends up being of interest. If you wanted to peruse these and provide your thoughts, that would help. Of course, as we discussed, I can arrange to have you guys talk as well.

Hope you had a good Holiday.

Subject: Request for Area Site Map for LST-1166

Hey John,

Thanks for the help. Attached is a new draft document and a Google image of the area. Locational data is on the bottom of the first page of the document. I'm interested in getting an areal site location map generated for the site, including cultural data and labeling such as the rivers, streams (Columbia River), towns (Rainier, OR and Longview Washington), Lord Island, Dibblee Point, highways, site location, etc.. Whatever works is fine, such as a topoquad. Might be nice to also have a second map view on a satellite image(?). To this end, the Google image shows about the resolution I'm interested in. Please call if you have any questions.

Thanks
