We'll likely take you up on that at some point. Right now it is clearing the record, we have a lot of duplication and we want to just make one clean organized record before we start asking for help.

SOW attached.

Good to hear we are moving forward. As far as any notes or other work products from T&T Bisso, I sent all that was given to me so there may be a delay for an specific items of that nature.

The Administrative Record is still a work in progress, our procedures don't easily translate so we are working on the conversion as best we can. Once we have something put together, we'll run it by legal and get it put on a disk.

Hi Chief,

Just thought I'd let you know what we're up to as regards the vessel.

Last week, our internal approval document that is needed to move forward on the EE/CA, the Superfund EE/CA Approval Memorandum, went thru concurrence and was signed by our Division Director. I immediately issued the tasking orders and funding to our contractors, Tech Law, to get working. I'm sure in the coming days we'll want to go ahead and schedule a site visit, as well as request other work documents USCG may have, such as any other work notes, reports, powerpoints, etc. provided by T&T/Bisso, or other stuff you guys may have in your files that may help us. Also, do you have a copy of the PRFA Scope of work in MS Word that I can edit/add to and get back to you so that we can get the PRFA up-to-date. All I have is the PDF copy.

Thanks,

Richard Franklin
