Just realized you didn't have a TDD to work from. Just created and sent it to you. Yell if you have questions.

Sharon,

I am very excited about this EE/CA opportunity. Can you enlighten me on
which TDD Richard is suggesting below we might capture some cost estimating time?

Best,
Steve

Hi Steve,

I enjoyed visiting with you today about the LST-1166 and the Engineering
Evaluation/Cost Analysis (EE/CA) that needs to be conducted so we the
options and costs for final disposal of the vessel. As I mentioned
before, until I get approval from my management, I cannot write a TDD
for Techlaw to work specifically on the project, but Sharon has informed
me that there may be a technical TDD that could be accessed for

a few
hours for an initial, brief review, and getting me a rough cost estimate. I am therefore attaching both a USCG powerpoint presentation
(data is a bit out of date, but gives you a good feel for what was
there) and an EPA presentation with up-to-date photos, a Briefing
document, and a link to get you familiar with the vessel and project.
The briefing document is good for history and recent timeline.

Again, thanks in advance for your help,
