LCDR:

Currently no site visits are occurring beyond visual verification of vessel status from the beach at Dibblee Point. The U. S. EPA is conducting the EE/CA and may have a site visit involved with that, in which case Mr. Franklin would be the POC.

Mr. Franklin:

The amorphous EE/CA process is unclear for me, will a site visit be occurring anytime soon that LCDR Lindgren can hop along for?

Greg/Chief-

If you have any visits scheduled for the LST, could you give me a heads up and let me tag along? I have yet to see it and it would be good to get eyes on it.
