Hey Mike- I've called Mike R with Roux and am now working with our START contractor to get answers to a few follow up questions. Just wanted to let you know that this is in the works.
Hope you're well.
Rob

Hi Mr. Parker,

While importing the historical data into our database, we came across one item that we had a question about.

We are trying to reproduce the results in the data tables from the Weston 2014 report and we noticed that different columns in the EDD were utilized for the validation qualifiers in the report. More specifically, it seems that in most cases the data validator qualifiers are utilized, except when there is a qualifier in the column labeled "QAFLAG" (Which are typically dated 2/7/2014).

I was curious what the QAFLAG column represents- Was there additional data validation completed? We thought this was important to understand so that we can be sure we are utilizing the correct information when using the data for the CFAC work. Thanks again for the time and help.

HI Michael -- Thanks again for your patience and for your reminder; I apologize for not closing the loop sooner.

I've attached two .zip files with the lab EDDs. One, titled "Unvalidated EDDs," are the lab EDDs. A second, "Validated EDDs," are the lab EDDs but also include our validator's flags and comments.

Let me know if you have any questions.
Rob

Mr. Parker,

Just circling back to see if you had a chance to look into the data from the CFAC investigation? Also, I wanted to note that we don't need any tables or post processing. We could take the raw edd and import to our database if you have that. Thanks.

We are hoping to add the lab data from the Site Reassessment work performed at CFAC (Weston, 2014) to our database so that the data can be referenced during the RI/FS. We have a pdf copy of the Weston report, but we were hoping to get a copy of the laboratory EDDs. This would make importing the data into the database much easier.
