8/15

Mr/Mrs Chuck Matt

Telephone (b) (6) [redacted]

Date November 13, 1984

Time

of Howie's Power Vac

Representing

Project Clean out of old baghouse at Jorgensen Steel Co facility (WAD000602813)

Discussed Howie's Power Vac has been contracted to remove baghouse dust residue from the old baghouse. The dust will be deposited at the Jorgensen Steel Co. facility to await subsequent pick up and transportation off site by an approved hazardous waste transporter. Mr Matt said that all of his employees will comply with pertinent B of L & I requirements for dealing with baghouse dust. He also said that tank cleaning (of the power-vac unit) will probably be handled through Northwest Tank Service or Crosby & Overton.
