Thanks, Rich. I'll draft some language that addresses those concerns.

Thanks, Rob. After speaking with you about being responsive to reporters once we are ready to talk about proposed listing, I realized that we also need to make sure we don't compromise the public review and comment process that goes along with a proposed listing. That means striking a balance between getting into too much detail on SF and specific cleanup requirements and presenting basic facts about next steps. One big criticism the company keeps hammering is that SF is inefficient, costly and that sites never get delisted/cleaned up—it would be good to have some messages that counter those messages.

Deliberative Process

Hey Cynthia,

We've taken the path today with media requests to not pre-empt the RA's letter to Gov Bullock suggesting that the CFAC site will be proposed this month, so we haven't said too much. When the letter gets out the door, we'll have to decide what our messages will be. Would you mind working on the key messages you think we should be discussing (including highlights from the RA's letter)? I imagine the messages will discuss the preliminary superfund process. I'm not certain when the RA's letter will be sent, but it could be sooner rather than later.

Thanks Cynthia. Hope you're doing well.

Rob
