TO: Karen Flournoy

FROM: Paul McIlburger MDNR 314/751-3241

DATE: 6-2-82

TIME:

SUBJECT: Litton ACD Spgfld., Mo.; Amoco Sugar Creek

SUMMARY OF COMMUNICATION

Litton - Paul ask for an update. I told him that Jim Dow had called a few weeks ago & said that based on EP Toxicity test results it appeared that the sludge was non-haz. Told him he would have to delist and gave him phone no. of Myles Morse. I told Paul that I had not heard anything since then & that we should probably send out a letter. Paul will call Jim Dow & then we'll discuss what to do. MDNR is anxious to get this fac. closed out.

I ask Paul about ~~Litton~~ Amoco & he transferred me to Tom Pauling.

Amoco Tom said MDNR had been working on disposal requests for sludges & that w/ delistings "it looks likes just about all sludge there is non-haz."

CONCLUSIONS, ACTION TAKEN OR REQUIRED

Told him we were interested wrt closure of the fac.

Paul called back on 6-2 wrt closure. He had called Jim Dow & Jim said that we had approved the closure plan. I told Paul that this was incorrect that I called Dow w/ comments (incl. requirement for soil testing) when he came up w/ the sludge could be non-haz. Paul agreed that soil testing would be necessary. He's going to write Dow a letter & find out what's going on & will cc EPA.
