Date/Time of Call	6/10/93 9:45am	☐ Incoming	☒ Outgoing
Recorded By:	David Wacker (Signature (required for HRS related TCRs))	**Title:**	Site Manager (Project Manager, Site Manager, etc.)
Jacobs Project No./WBS	13D253-15 (511)	**Client:**	Radium Pet. (EPA)
Person Contacted (Name, Title)	Chuck Aderhold, Lab Analyst	**Phone No.**	417 831 8835
Person Contacted (Organization/Agency)	City of Springfield		
Subject:	mun. well-water use in Springfield		

Conversation Summary

Jacobs (Questions/Replies)	Contact (Questions/Replies)
Which wells on the water Distribution map you sent us are the distribution wells?	Orchard Crest, Kansas, and Fairview
What about the one labelled Bogard?	Bogard is ~~the name of the~~ ~~[illegible]~~ ~~[illegible]~~ tank that is near the Orchard Crest well.
So the Orchard Crest well is the one labelled Bogard?	Essentially.
How much water and how frequently are those wells used?	The wells are more expensive to get water from than surface intakes so they are only used during times when surface water becomes less available — like in the summer.

Do you know the percentage of water in the Springfield system that comes from wells?	For Fiscal Year 1992 well water represented 1% of total pumpage. When the wells operate though they represent a larger percentage.
Is water from these wells just injected into the system or is it treated?	It is chlorinated & fluorinated but does not run through a treatment process like surface water.
How many people does Springfield water serve?	Approximately 150,000
