February 14, 2018

Dear EPA,

I am deeply concerned about the proposed plan for the West Lake Landfill. It is necessary to remove <u>all</u> the radioactive material from the site because all of it is lethal. What is removed must be stored in a remote place off-site and safely contained not near any flood plain.

Residents of the area must be offered a buy out that reflects the value of their property prior to the discovery of radioactive materials. Anything less is unjust.

Sister Josephine Niemann, S.S.M.D.
