Feb. 12, 2018

Dear EPA:

I am very concerned about the West Lake landfill and it's effect on the residents of the area, including our sisters who live just five miles away.

Do remove ALL contaminated materials, and store it in a safe place off-site. Remove radioactive material because it is in the Missouri River Flood Plain. Remove 100% of the radioactive material as it is all lethal. Do everything to keep our drinking water absolutly safe.

Sister Virginia Grumick
