March 3, 2018

Dear Mr. Washburn,

I am writing to you regarding the radio active waste in the West Lake Landfill. Please note that we as a community cannot tackle this on our own. It goes without saying there are many devastating outcomes that could possibily happen if the waste isn't cleaned up or the fire isn't eliminated. My understanding is that fires are somewhat common in landfills, but the radioactive waste isn't. Please use your resources to help the nearby community along with the neighboring communities as we are all affected by this.

Feel free to contact me at [redacted] if you like.

Thanks for any help you can provide.

Regards,

Kyle Freels
