Dear Mr. Washburn,

I am very concerned about the Bridgeton/West Lake landfills. I am deeply concerned about the negative effect on our watershed. The site must be relocated. There must be 100% disposal of the waste. There must be temporary relocation of the families involved. There has been a grass fire within the landfill property close to the radioactive waste.

There is a higher than average instance of childhood brain cancer near the landfill. Please act!

30351062

Sincerely,
Rene Freels, [redacted]

R. Freels
