SUMMARY

Mr. Erickson called regarding our March 5, 1992 SWMU information letter. He wanted to know more about the definition of a solid waste management unit. I told him a SWMU is any area that was used for the storage/treatment/disposal of wastes, including hazardous wastes. Mr. Erickson informed me that the facility is not owned by Eagle Signal (for about the last 6 years). Brown Traffic Engineering owns the property and uses a portion of the building. Eagle Signal leases the portions they occupy. I told him to reply to the questions to the extent he was able.
